Chennai, India - [GitHub](#) - [LinkedIn](#) - [LeetCode](#)

Education

B.Tech in Information Technology, College of Engineering, Guindy – Anna University
CGPA: 8.2 (upto 5th Semester)

2023–2027

Skills

Languages & Technologies	C, C++, Python, JavaScript, TypeScript, Java, SQL, HTML, CSS, Solidity
Frameworks & Libraries	React, React Native, Node.js, Express, Next js, Tailwind CSS, Electron js, SpringBoot, Three js, Ethers
Tools	Git, Postman, Expo, Docker, Figma, Vercel, Render
Operating Systems	Ubuntu (Primary), Windows, Kali

Projects

Anna-Oasis

Tech Stack: React Native, Gluestack UI, Tailwind CSS, Express, Supabase

[GitHub](#) - [Certificate](#)

Internship - Anna University (May 2025 – July 2025): Developed a mobile app for international student hostel admissions and management, focusing on frontend, reusable components, and API integration; project considered for official deployment.

Lew

Technologies : React Native, Express.js, MongoDB, ESP32, Embedded C++, BLE

[GitHub](#)

Developed a BLE-based autonomous user-following robot using ESP32, React Native, Node.js, and MongoDB with RSSI-based movement control and backend verification. Implemented BLE communication, QR-based bot assignment, secure booking verification, and real-time motor control integrating mobile, backend, and embedded systems.

Orca

Tech Stack : Electron.js, Node.js, React, and TypeScript

[GitHub](#)

A cross-platform desktop IDE for lab assessments that works entirely within a Local Area Network (LAN). Teachers can host assessment rooms, collect student project directories, evaluate submissions, assign marks, share reference materials, and communicate via chat - all offline.

Oriyam

Tech Stack: React Native, React, Node.js, TypeScript, PostgreSQL, Cloudflare R2

[GitHub](#)

A platform connecting farmers and landowners for land rentals, enabling land posting, browsing, deal requests, payments, and admin oversight of users and listings.

Git Simulator

Tech Stack: React.js, C++, Crow

[GitHub](#) - [Website](#)

Developed a real-time Git Graph Simulator using C++ and Crow. Visualizes commits, branches, and merges with dynamic updates and commit input handling.

Exitor

Language: C

[GitHub](#)

A minimalist VI-like text editor built for the xv6 OS. Supports file editing, copy-paste, and includes a custom memory allocator via user-defined system calls.

Achievements & Extra-Curriculars

- 1st Place – Service Design Jam by BNY Mellon, Kurukshetra'25 [Submission](#)
- Participated in Syntheix 3.0, VIT Chennai
- [Letters of Appreciation](#)
